

NAME TAG GRAB

Items Needed: Sticky-back name tags, Marking pens

Have the group form a circle and give each player a name tag. Have them write their names on the tags with a marker, but do not take the back off the tag. Collect all the name tags, mix them up, and redistribute them so no one has his/her own name. Ask the group members not to reveal whose name tag they are holding.

Have the people place the name tag that they are holding on the back of the person to their right. Then have everyone move among the group and try to locate their own name while at the same time trying to avoid having someone find his/her own name on their back. Once a person finds his/her own name tag, they grab it off the back of the person who had it and place it on their own chest for all to see. The game ends when everyone finds his/her own name.

Since nobody knows whose name is on their own back, all should try to avoid having others look at their backs. The person who keeps the name on his/her back the longest is the winner.
