

## RELAY RACES

**Items Needed:** Ball of string with a spoon tied to one end for each team.

Divide into teams with a similar number of people on each team. Give each team a ball of string with a spoon tied to one end. Instruct them that when you say “go”, they are to string their team together by putting the spoon and string down under the clothing of the first person in line and up through the clothing of the second person in line, and so on until the entire team is strung together. The team that gets strung up first wins.
