

LIFE SAVER GAME

Items Needed: Tooth picks for each person, one lifesaver per two people

(This game is most successful when played with people over the age of 12.)

Divide the group up into two teams. Have them line up side to side. Give each person a toothpick to put in their mouth. Then place a Lifesaver on the toothpick of the first person on each team. The lifesaver must be passed from person to person to the end. The participants are not allowed to use anything but the toothpick in their mouth to pass the Lifesaver. If the Lifesaver is dropped, or if hands are used, a new Lifesaver has to start over. The first team to successfully pass the Lifesaver down the line to the last person wins.
